

Innovative Cold Chain Solutions For Logistics Industry

Meeting stringent requirements for handling wide range of temperature controlled products

Project : Upcoming logistics firm based in South India. It has over 100 refrigerated vans & integrated warehouse facilities

Project Requirement

- Low temperature cold storages
- Room needs to be maintained at -20°C
- Storage of medicines, ice-cream, frozen food products is critical

Best Practices

- Temperature needs to be maintained precisely at -20°C as any change can affect the quality & taste of the product

Emerson Solution

Customized semi-hermetic condensing units for high efficiency & precise temperature control

Comprehensive warehousing facilities for frozen, chiller and ambient storage of perishable goods along with transport & value added services

EMERSON. CONSIDER IT SOLVED.
