

In-Transit and Cargo
Monitoring Solutions

The global perishable supply chain is complex with many handoff points. Our core technologies, coupled with our cold chain expertise, help retailers, restaurants, growers, suppliers, shippers and exporters mitigate food waste while helping ensure only the freshest and safest products reach consumers. Our cold chain solutions provide visibility into in-transit cargo shipments, help enable streamlined supply chains and promote better quality and safety decisions.

GO Trackers – Real-Time Actionable Data via Cellular Connectivity

GO Real-Time 4G/5G Tracker

- Monitors temperature, location, light and humidity
- Global visibility with real-time alert reporting
- Provides dual-mode, advanced cellular technology with 2G fallback

GO Real-Time Tracker*

- Monitors temperature and location of shipments in real-time
- Promotes efficient management of cargo throughout the supply chain
- Alert reporting in real-time via text or email

GO Real-Time Lux Tracker*

- Monitors temperature, location and light
- Light detection ideal for tracking door openings and unauthorized cargo access
- Real-time alert reporting for loss prevention of high value assets

GO Real-Time XL Tracker*

- Monitors temperature, location and light, features extended battery life
- Suitable for longer over the road and international ocean shipments
- Real-time alert reporting with global visibility

GO Real-Time Reusable 2G/3G Tracker

- Monitors temperature, location and light, features extended battery life
- Multi-use, rechargeable tracker for closed-loop applications
- Access to real-time alert reporting before final delivery

GO Real-Time CO₂ Tracker

- Monitors temperature, location, light and CO₂ in a rechargeable format
- Ideal for tracking CO₂ product shipment levels in transit
- Access to real-time alert reporting with CO₂ sensor charts

GO Real-Time Flex Tracker

- Monitors location, temperature, humidity, light, features external probe
- Dual ambient and probe temperature tracking
- Real-time temperature alert reporting with humidity charts

* Available in 2G and 2G/3G models

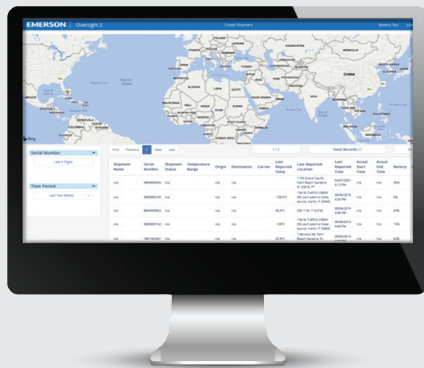

Insights at Your Fingertips

Oversight and Oversight Mobile

Comprehensive and automated reporting is provided through the Oversight Dashboard and the Oversight Mobile app. Our technology aggregates encrypted data streams from GO Real-Time Trackers and Loggers into an online portal enabling cold chain insight into the perishable supply chain. The interface provides robust reporting of key shipment information including temperature, security and location details. Both Oversight and the Oversight Mobile app are available in multiple languages including English, Chinese, Spanish, Italian, German, Portuguese, Turkish, Russian, Korean and French. Oversight is the central cold chain reporting solution for in-transit shipments.

GO Loggers – Data Insight Beyond Your Eyesight

GO NFC Logger

- Monitors time and temperature data via short-range NFC (Near Field Communications)
- Supports Android and iOS devices with NFC mobile app or NFC Pad Reader
- Data can be stored locally or uploaded and managed via Oversight

GO PDF Logger

- Monitors time and temperature data for perishable and life science products
- Integrated USB connection point for direct computer access
- Automatically generates PDF file, no additional software or readers required

Available in Lite model

GO Contact Logger

- Monitors time and temperature data
- Provides surface read data
- Temperature data accessed via the Contact Reader

GO TH Logger

- Reusable, monitors temperature and humidity levels and is programmable
- LED screen allows for easy reading of current data and alarm conditions
- Data and reporting available with TH Software

GO Bluetooth Plus Logger

- Monitors time, temperature, humidity and pulp temperature
- Two probe options, optimal for a variety of perishable products
- Pairs with Bluetooth reader mobile app for data read range up to 100 feet (30 meters)

GO Systems – Flexibility with Single Solutions

Inbound Monitoring

A self-contained, wireless system that provides a streamlined, automatic temperature monitoring experience. AutoSense™ Gateways are installed in facilities. They are pre-configured and automatically connect when turned on, creating their own independent network. When GO Wireless Loggers arrive on containers, data is wirelessly sent to Oversight for ongoing storage and analysis. Text and email alerts are created and delivered to predefined quality assurance personnel.

Facility Monitoring

Monitors temperature and humidity in stationary areas such as storage and processing facilities, walk-in coolers, freezers and cold cases. Easy installed, it collects and stores data in a centralized cloud database where alert and compliance reports can be automatically generated. The system uses wireless loggers and gateways that connect to the cloud database, utilizing cellular connectivity. The system is self-contained and independent of existing networks.

Electronic Data Interchange

We offer Electronic Data Interchange (EDI) integration for many platforms, including Transportation Management Systems, Enterprise Resource Planning and Warehouse Management Systems. By providing data exchange services, we enable our customers to benefit from Emerson's decades of cold chain experience. Call Emerson Cargo Solutions for more details.
