

SMS ALERT

Quick guide: how to enter to the SMS service

Thanks to SMS ALERT it is possible to receive SMS messages through web interface management. The sending of single or multiple SMS is easy and safe and can be made with machines, web sites and private applications. Besides sending service, it is possible to verify the effective delivery through notice, and to receive SMS messages from remote systems on your own application. The system integrates message services with company informative systems, portals and client web sites.

You can enter on SMS ALERT service via internet, against registration.

Enter on <http://smsalert.netech.it/> to see the home page.

Push "Enter" to go on Log-in page.
